

VIKRAM YADAV

vsyadav0502@gmail.com | +919166298554 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate skilled in Java and Python, with strong Data Structures & Algorithms and competitive programming (Codeforces) fundamentals. Experienced in full-stack development (Flask, SQLite) and applied AI (Vision Transformers, CNNs, OCR).

SKILLS

Core Languages & Problem Solving: Java (OOP, DS&A), Python,, JavaScript, SQL, HTML/CSS, Competitive Programming (Codeforces,leetcodes)

Backend Development & Architecture: Full-Stack System Design, Flask, SQLite (schema design & querying)

AI & Applied Mathematics: Applied AI, OCR (EasyOCR), Linear Algebra, Statistical Inference

Developer Tools & Practices: Git & GitHub, Debugging, VSCode, Canva, EmailJS

EDUCATION

VITBhopalUniversity

CGPA:8.02/10

B.Tech. in Computer Science and Engineering | Grad. 2023 - 2027

GudhaInternationalSchool(CBSE)

Percentage:92.20/100

Intermediate with PCM | 2020-21

Gudha International School (CBSE)

Percentage: 91.60/100

10th | 2018-19

PROJECT WORK

Human Disease Detection using Deep Learning

- Implemented a Vision Transformer (ViT) for X-ray/MRI disease detection, achieving 92% classification accuracy, fine-tuned on 10,000+ images,improvingtrainingefficiencyby25%.
- Built an intuitive UI for seamless image upload and instant analysis.

Plant Disease Detection using CNN

- Developed a CNN model to classify leaf diseases, achieving 95% accuracy; optimized training pipeline, reducing training time by 30%.
- Built a user-friendly interface enabling farmers to upload images and receive instant diagnosis.

Automatic Car Parking System

- Developed a full-stack automated parking system using Python and Flask, integrating Plate Recognition (LPR).
- Engineered backend logic and SQLite database for real-time slot management within a

CERTIFICATES

- Google IT Support Certificate - Google IT
Foundational knowledge of IT troubleshooting, networking, operating systems, and system administration.
- Marketing Analytics - NPTEL
Applied data-driven techniques for measuring and optimizing marketing performance and campaigns.
- Python using AI Workshop - AIfor Techies
Practical Python applications for building and integrating AI-driven solutions.
- Python Essential - Vityarthi
Core Python fundamentals: syntax, data structures, and problem-solving techniques.

CORE COMPETENCIES & LEADERSHIP

- Team Collaboration & Leadership | Critical Thinking & Problem-Solving | Time Management & Organization
Agile/Scrum & SDLC Awareness | Code Review & Documentation | Cross-Functional Communication
- ServedasaDisciplinaryCommitteeMemberforAdvitya,ensuringsmoothcoordinationand zero code-of-conduct violations during a 500+ participant event.
